

## **Maple Drainage Ltd Accessibility Policy**

Maple Drainage Ltd are committed to making our website accessible by all people, whatever their disabilities or abilities.

Maple Drainage Ltd may change this policy from time to time by updating this page. You should check this page from time to time to ensure that you are happy with any changes. This policy is effective from June 2017.

We have aimed to make our website as usable as possible without our visitors having to change anything. However, should this not be the case, you may find it useful to customise your computer settings to suit your individual needs. For example, increase the font size, change the contrast, or have the site spoken to you. We have also added options at the bottom of every page to enable you to change the contrast or font size of our website, in order for you to get the most accessible experience available.

If you would like more information on customising your settings, we recommend you visit [BBC My Web, My Way](#) to watch videos of how these customisations – either using **accessibility features of your computer** or through installing **assistive technologies** – might suit you.

### **Limitations**

Whilst we have tried to ensure this site's accessibility, there may still be limitations due to technical understanding, or the theme used, and we have not yet user-tested the site with disabled people.

If you find anything on the site difficult to use, please let us know on our [Contact Form](#) using 'site issues' as the start of your message.

To help us get to the bottom of your difficulty, it would help us if you provide the information advised in ['Contacting Organisations about Inaccessible Websites'](#) in your message.

All constructive feedback regarding the accessibility or usability of this website is welcome and will be carefully considered.
